MKT Manufacturers' Representatives

A Division of MKT Metal Manufacturing

Offering a range of exceptional products, all from top quality manufacturers.

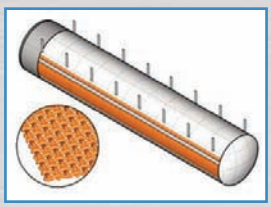
ATC TEXTILE DUCT

The Benefits of Textile Duct

- Linear diffusion made to measure and suited to all types of premises.
- Rapid insulation for both ducting and diffusers
- Light weight
- Hygienic alternative to open duct
- Unlimited range of colors
- Saves on installation, transportation, and energy
- Multiple hanging systems available

ATC

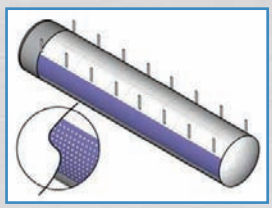
Over 30 years' experience in manufacturing textile ducting



IMPULSION

The Principle:
Medium or high-speed air dispersion (from 2–7m per sec.) through woven wire strips.

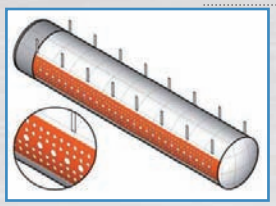
Benefits:
- Air Dispersion range from 3–8m
- Less diffusers required for the area



RADIANT

The Principle:
Low-speed air dispersion (0.2–1m per sec) through a porous fabric surface.

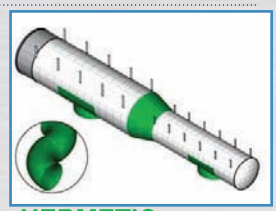
Benefits:
- Air Dispersion range from 4–30m
- Ideal for use with reversible units, evens with high temperature gradients



ENERGY

The Principle:
Medium or high-speed air dispersion via calibrated openings (from 8–30m per sec).

Benefits:
- Air Dispersion range from 4–30m
- Ideal for use with reversible units, even with high temperature gradients



HERMETIC

The Principle:
Diffusers for transporting air

Benefits:
- Sounds are damped
- Minimum support structures are required

ATC Benefits

- Economical
- Proper and accurate solutions from a full-time team dedicated to each individual project
- Flexibility and adaptation because there is no standard product in ATC's range. ATC adapts to customer needs.
