

Spiral ductwork offers a blend of appealing aesthetics and improved airflow efficiencies to project designs. At **MKT**, we strictly adhere to SMACNA Construction Standards when supplying spiral pipe and fittings, while meeting all projects specifications and client requests. We also provide additional round products and accessories which complement our custom-made products. **MKT's** customers benefit from services offered to enhance their overall experience.

MKT is a major manufacturer of Commercial and light Industrial Ductwork, and HVAC materials. We use the latest equipment and strategic processes to produce large volumes of high-quality products. Focused on providing excellent customer service, we ensure that all projects receive comfort and quality through our expertise in fabricating the conduit for conditioned air conveyance.

Ductwork Construction:

Unlined – Most commonly receives external insulation after installation of the product.

Acoustically lined – Internally lined to achieve required R value and acoustic properties. Several liner types and thicknesses available. All fittings to be Double-Wall construction.

Double-Wall lined (DBWL) – Internally lined ductwork which is secured by an internal layer of metal. 23% O.A. with 3/32" holes, on 3/16" staggered perforated and solid inner-walls, standard. Custom perforations available.

Materials:

- Galvanized & Galvannealed
- Copper
- Stainless Steel (304 & 316L)
- PCD
- Aluminum

Connections:

- Slip-fit/Couplings –
- Gasketed Couplings – Improved installation efficiencies from true seal of connections
- Flanged – 12" and Above for all DBWL materials
- Flanged with Barrel Clamp – For consistent seal on all flanged systems

In addition to Spiral fabrications, **MKT** offers our customers the option to include various products and services. Allow our team to reduce your field labor costs by offering:

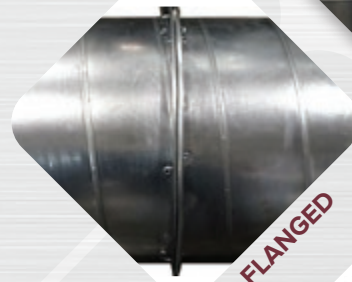

Accessories:

- Grill Boxes – (installed or loose)
- Taps/Take-offs – HETOs, Conical, Bell-mouth, Air-Tites, Etc.
- Balancing Dampers – OBD and Single-blade (installed or loose)
- Several products to complete the required scope of ductwork available

Services:

To compliment our quality fabricated products, **MKT** provides value adding services.

- Mounting/cutting in of saddle taps, grill boxes, dampers, etc.
- Cut to Length materials to meet demands of coordination
